This game is occasionally fun for a few seconds at a time! I wanted to give it the benefit of the doubt, since I do love the lighting, the cute protagonist, and the okay music. I'd probably play with the real-time editor a bit more, but the unfair/awful level design, the bugginess, and, well, everything else, just kills this game (and not in a good way).. Awful full of bugs sloppy game. The gamepad is not working with this "full controller supported" game.. gt;. Royalty free music and sound effects all over the dang place. When you get a game over, it says "Game Over" 3 times which suggests that the dev. for got to just crop the audio down to one after getting it from somewhere, kinda lazy bro. A bad Super Meat Boy clone. Not worth checking out for \$8, just wait and get Super Meat Boy during a Steam Sale for \$0.90 (it typically goes on sale for that much). Got this game as a part of an indie bundle.. I really enjoy this game!! It's true that it's very difficult but. I love when I can pass to the next level.. Wow. The devs have a true gem on their hands. Said that. - Needs a more polished game menu. - I tried to play local coop and couldnt do it. The 2nd controller is invisible to the game. Need to fix and polish gamepad/keyboard inputs - Needs some turn on the f*** lights item lool Imagine Super Meat Boy with the coop of ibb & obb. Imagine ibb & obb with the rage of Super Meat

Boy. I hope they patch this game as it deserves. I'd pass pleecenty of hours playin' it if they fix/arrange menu, gamepad system, solid online features is welcome too. And of course, levels and who knows workshop. ^^ . Would be a hit, no doubt.. This game is occasionally fun for a few seconds at a time!
